Audi
Genuine Accessories

Audi Genuine Accessories. As individual as you are.

Your Audi is not just a means of getting from A to B: You also use your Audi to plan experiences – from A to Z. You only stop briefly at your destination before heading off again. And it is precisely for excursions such as these that we are creating more options. Audi Genuine Accessories: products that make good on our promise of quality each and every day. For you, that means benefitting from made-to-measure solutions that impress with their high levels of functionality and safety. After all, the quality standards imposed on Audi Genuine Accessories during the development and production stages are just as high and just as crucial as for any Audi. Discover what tailor-made solutions Audi Genuine Accessories has in store for you.

Our products have to withstand a lot. The heat of the Kalahari, for example.

There is a place in the world where the temperature reaches 50 degrees Celsius for an uninterrupted period of 500 hours. This place can be found in Ingolstadt. The location in question is a test lab in which products including those from the Audi Genuine Accessories range are tested. In the lab, we simulate the most extreme climatic conditions so that we can test our transport products in the most diverse weather conditions – even ones that would never occur normally. A bicycle rack, for example, must withstand the impact of an entire year spent at high speeds. In addition to long-term exposure to artificial weather, xenon lamps are used. These lamps, when combined, produce a high level of heat that is almost equal to that of the sun. And although such a high level of stress on the products is already very demanding, this test procedure is just one of many. All of these tests combined share a common goal: To ensure that you can rely on our transport accessories at all times when on your travels.
