Fuel consumption and CO2 data applies to the German Market. The specified values are determined in accordance with certain test procedures. The specifications do not refer to an individual vehicle but serve only as a basis for comparing the different types of vehicles. In addition, the consumption figures achieved during normal driving may differ from the test values, depending in particular on special equipment fitted, vehicle loading, personal driving style, road and traffic conditions, environmental factors and conditions of the car

It is recommended that all TDI engines use a maximum of 50ppm diesel fuel or less

PCG	Adaptive cruise Control (with stop & go function) and Pre sense front. Pre sense front uses the radar sensors of the Adaptive Cruise Control to monitor the risk of a collision with traffic in front. If Pre Sense Front detects a hazard situation Audi braking guard warns the driver. The system then supports the driver, as soon as he /she reacts and increases braking force if necessary. Initiates partial braking if the driver does not react. In extreme cases, system activates anticipatory protective systems. The system can brake the vehicle to a standstill and resume again at the driver's request.	26915	26915	26915	26915
