

The Audi e-tron and e-tron Sportback

Future is an attitude

To reserve yours, visit [audi.co.za](https://www.audi.co.za)

Born from Audi's track record of over 100 years of pioneering innovation, the Audi e-tron and e-tron Sportback are stylish, future facing utility vehicles that offer incredible acceleration, an almost silent drive, and the pleasure of driving without CO₂ emissions. Each of these advanced vehicles has a maximum range of over 400 km as well as the pioneering technology and edge-of-your-seat driving dynamics you expect from your Audi.

Future is an attitude

All electric. All Audi

Personal space, unrestricted mobility and a powerful driving experience: Regardless of whether you're travelling the city, towing a boat to a nearby beach or trying to reach an off-road destination, the Audi e-tron is designed to deliver.

Two electric motors rapidly and silently accelerate these electric utility vehicles with starting performances comparable to those of a sports car. An electric all-wheel drive system creates optimal traction and handling in all driving situations, while adaptive air suspension can almost instantaneously adjust your drive for enhanced comfort.

The shapes of the future

Sculpted, aerodynamic and luxurious in its design, the Audi e-tron takes stand out elements of Audi design and adapts them for the electric age. Design and technology are fused into one by Matrix LED headlights, optional virtual side mirrors, expansive rear light strips and a sleek rear bumper made possible by the lack of exhaust pipes.

Future is an attitude

The Audi e-tron

Distinctively an SUV, the Audi e-tron's shoulder line is a powerful design element. It runs from over the headlights and over the flank to the taillights, giving the car a low centre of gravity.

The Audi e-tron Sportback

The e-tron Sportback combines the practicality of a powerful SUV, with the elegance of a four-door coupé. The sloped rear window creates a sporty, dynamic impression and a stand out silhouette that seems perpetually in motion.

Future is an attitude

The Audi e-tron S Sportback

Dynamic and fast the Audi e-tron S Sportback shows it's power at first glance. It is the first mass-produced vehicle to feature 3 electric engines, two of which are mounted on the rear axle. It's broader stance lends itself to more aggressive styling, with strongly contoured bumpers, large air curtains, and front and rear silver highlights.

Future is an attitude

Electrifying, inside and out

The Audi e-tron and e-tron Sportback offer first class travel experiences, even in the second row. Their spacious interiors provide generous legroom and comfort, with high-quality, premium materials and a sense of quiet made possible by the all-electric drive.

Future is an attitude

Intuitive and connected

Stay in touch with your digital life on the road with the driver-centric Audi virtual cockpit and a large multimedia interface with touch feedback and two large displays in the centre console.

Packed with driver assistance technology, the e-tron and e-tron Sportback also boast front and rear Parking aid, a rear-view camera and lane change assistant as standard equipment.

Future is an attitude

Charging at home

With unrivalled convenience and easy access to electricity, it's no surprise that over 80% of electric vehicle charging happens at home. Using the standard Audi compact charger on a single phase, 32-amp industrial socket, the Audi e-tron charges to 80% (from an estimated level of 5%) within approximately 10 hours, making overnight top ups as easy and habitual as charging a cell phone, laptop or tablet.

Future is an attitude

Charging in public

With a rapidly expanding network of over 300 charging points already available, Audi e-tron drivers can instantly enjoy the flexibility and freedom of recharging on many popular routes, each of which is conveniently discoverable with the e-tron route planner.

Fast charging points will also be available at all Audi e-tron dealerships, nationwide.

To facilitate our drivers' transition to the EV charging experience, Audi will also provide a complimentary Gridcars billing card with the first year of membership paid for by Audi.
