Now is calling.

In a world full of possibilities, every day is an opportunity – grasp them with the new Audi Q5.
Created for virtually every landscape:
the new Audi Q5.

Don’t leave anything to chance. Whether you’re looking for comfort, style or dynamics, this premium SUV will win you over from the word go. Thanks to its expressive look, powerful drive and pioneering technologies – and a wealth of options. Day in, day out – with the new Audi Q5.
Developed to move you. Even when standing still.

Every detail of the new Audi Q5 is characterised by the typical Q design and embodies dynamism and confidence. Take the striking bonnet or the gently sloping roof line, the exterior mirrors on the shoulders and the slim window line. The optional partly polished cast aluminium wheels in 5-segment spoke design in contrasting grey are an expression of exceptional sportiness. And leave a lasting impression, even off-road.

The figures for fuel consumption and CO₂ emissions can be found from page 56 onwards.

*Please note the special information relating to wheels on page 58.
Give light a whole new design:
the Audi Matrix LED headlights.

The new Audi Q5 is a shining example. It impresses from afar with the optional Audi Matrix LED headlights. The LED daytime running lights are unmistakable. The dynamic indicators unmissable. The headlights adapt to the situation in seconds and make progress visible. Just a glance at the large and powerful front end lines, which emphasize the width and strength of the Audi Q5. Even before you hear the engine roar.
One of quattro’s strengths is recognising the right moment. Ready for almost every terrain. And the challenges of the future. The quattro all-wheel drive system with ultra technology. For all 4-cylinder engines with quattro permanent all-wheel drive. An intelligent operating strategy ensures that your Q5 is efficient, dynamic and safe – with the familiar level of traction. If quattro is not required, the all-wheel drive switches off, thus helping the driver to save fuel. Of course, quattro remains permanently available, always ready to respond should the situation demand it. Impressively providing a balanced distribution of drive forces in a wide range of road conditions. And for even more dynamic handling on bends, there’s quattro with sport differential – an option for the 6-cylinder engines. Matchless fascination, again and again.

The figures for fuel consumption and CO₂ emissions can be found from page 56 onwards.

The figures for fuel consumption and CO₂ emissions can be found from page 56 onwards.
Dampens almost everything. Except your enthusiasm.

The optional adaptive air suspension adapts the damping forces of each individual wheel to the driving situation. Depending on terrain, personal driving style and the Audi drive select mode chosen. Precisely and in milliseconds. The different height levels allow you to conquer virtually any bump in the road. The air suspension also continuously compensates for additional weight. The body can be lowered by up to 55 mm for more convenient loading by pressing a button in the luggage compartment. What’s more, you can use Audi drive select to modify the vehicle’s character: to make it more efficient, comfortable or dynamic. But always thoroughly individual.

The figures for fuel consumption and CO₂ emissions can be found from page 56 onwards.
Helps save fuel.
Without compromising on power.

The TFSI and TDI engines make the new Audi Q5 efficient and perceptibly powerful. The 4 and 6-cylinder engines shine with enhanced performance. The optional quattro all-wheel drive guarantees a better response during steering and acceleration. And the start-stop system - new to the Audi Q5 - brings more efficiency. The engine is switched off during coasting. The benefit: to reduce consumption without sacrificing performance.

The figures for fuel consumption and CO₂ emissions can be found from page 56 onwards.

¹ Not available for 2.0 TDI (110 kW).
Take centre stage. Without leaving your seat.

The interior of the new Audi Q5 is geared towards the driver and offers plenty of room for customization thanks to the longer wheelbase. Choose how you want to emphasize many of the details with high-grade materials such as fine nappa leather, expressive design elements, and ambient lighting options. An impressive atmosphere featuring acoustic glazing as standard and sport seats in the front with optional massage function. Proving that the driver is always the number one priority.

The figures for fuel consumption and CO₂ emissions can be found from page 56 onwards.
The figures for fuel consumption and CO₂ emissions can be found from page 56 onwards.

Demonstrates greatness. In every detail.

The new Audi Q8 impresses with a large boot volume, a more generous amount of space and practical storage options. The standard luggage compartment roller cover and the optional luggage compartment mat allow you to adapt the luggage compartment exactly to your requirements. Even the luggage space itself is variable: the optional rear seat bench plus allows you to turn 550 l into 610 l in no time at all. With the aid of the remote backrest release and the luggage compartment release makes loading even easier. If your hands are full, open the tailgate with a foot gesture. And store even heavy cases with ease.
Enthusiasm is calling

Enthusiasm is the most powerful driver. It is the only thing that creates the desire to forge new paths. Discover the new Audi Q5.

The figures for fuel consumption and CO₂ emissions can be found from page 56 onwards.
Leads the way.

And helps the driver read the signs.

Numerous assist systems help to make every trip in the new Audi Q5 more comfortable. The optional camera-based recognition of traffic signs helps you to stay on route. In view of moving traffic, the optional active lane assist with Tiptronic Co. function, including traffic jam assist can provide support by automatically keeping the vehicle in lane, braking and accelerating. Audi active lane assist keeps you in line with the lane. The system is activated when the vehicle is driven on a road with a marking and the vehicle is traveling under 60 km/h. It monitors lane markers, lane positions and lane changes even with a small deflection of the steering wheel. If the system recognizes that the vehicle is deviating from the lane, it intervene to help keep the vehicle within the lane. Audi active lane assist applies pressure to the brakes on the inner wheels, thereby making the next lane change easier. Audi active lane assist can only position the vehicle in the lane. It cannot prevent the vehicle from deviating from the lane.

In addition, lane assist supports the driver in avoiding potential collisions. The optional park assist makes parking easier and reduces the risk of accidents. It includes static and dynamic functions and determines the space and steering angle available. The system helps the driver park in tight spaces, for example, in parallel parked cars. The figures for fuel consumption and CO₂ emissions can be found from page 56 onwards.

¹ Please note: The systems work only within system limits and assist the driver.

Moreover, the driver remains responsible for all actions the vehicle and is required to be attentive at all times.

The figures for fuel consumption and CO₂ emissions can be found from page 56 onwards.
Easy to operate. Hard to miss.

The large, slim 8.3-inch colour display in the optional MMI navigation plus offers improved clarity and a straightforward menuing concept. So that you are well informed in no time at all. Navigation, radio, phone or Bluetooth connection: just press the button to meet your needs. Quickly, intuitively and on request with MMI touch. Control everything via touchscreen or voice control. The optional Audi smartphone interface³ integrates selected mobile phone content into your Audi.

Everything at a glance. At the right moment.

The optional Audi virtual cockpit makes progress visible. The fully digital instrument cluster with high-resolution 12.3-inch screen display a wide range of driver-related information—from speed and navigation to communication—you choose from numerous display options. And have the future in sight.

The optional Audi head-up display projects driver-related information such as speed, navigation data and a range of assist system data as a full-color virtual display onto the windshield. Directly in the driver’s field of vision. The head-up display can be adjusted depending on the driver’s height, seat position and preferred content. So you can keep your eye on lots of things without losing sight of what’s important—the road.
Discover the world with Audi connect.
Without driving a metre.

With the aid of optional Audi connect services\(^1\) you can get an impression of your destination even before you arrive thanks to the intelligent integration of Google Earth\(^.cy\). Access messages and emails on the road, arrange a servicing appointment with your Audi partner or activate the auxiliary heating via your smartphone and before you get in the car. Audi connect keeps you perfectly connected everywhere and at any time. Even if you break down, help is only the push of a button away. So you can continue your trip as quickly as possible.

Takes the driver everywhere.
Even to new worlds of sound and light.

The optional Ambient lighting package makes the interior shine in a special light. Even the inlays on the dashboard are illuminated. Match the colour by your personal taste. On request, you can enjoy a concert hall atmosphere with the Bang & Olufsen Sound System. No fewer than 19 loudspeakers create an unmistakable 3D sound. And win thunderous applause from all passengers.
Now is calling.

City, country, forest track, road, motorway, weekend, family, holidays. Beach and fields, try endless possibilities. Experience them. In the new Audi Q5.

The figures for fuel consumption and CO₂ emissions can be found from page 56 onwards.
More exceptional.

With QS design and Audi design selection.

In an Audi Q5, there is plenty of room for your ideas to unfold. With the QS design line, for example, you can integrate striking highlights that reflect your personality. And it goes in style with the Audi design selection, which offers an attractive range of special materials and colours for the interior. Choose your preferred combination of selection, inlays with exquisite leather seats featuring attractive contrasting stitching.

The figures for fuel consumption and CO₂ emissions can be found from page 56 onwards.

### Technical data

- **Engine type**: Diesel engine with DRIVE SELECT multitable and Audi valvelift system
- **Transmission type**: 8-speed tiptronic
- **Drive type**: quattro permanent all-wheel drive
- **Power transmission**: 2.0 TFSI engine with DRIVE SELECT multitable and Audi valvelift system

### Fuel consumption

- **Combined**: 6.2–5.7 l/100 km
- **Urban**: 5.3–4.9 l/100 km
- **Extrourban**: 5.1–4.7 l/100 km

### Technical details

- **Model**: Audi Q5 2.0 TFSI quattro (185 kW)
- **Engine type**: Diesel engine with DRIVE SELECT multitable and Audi valvelift system

### Explanatory notes

1. **Unladen weight**: includes driver (75 kg) and fuel tank 90% full, calculated in accordance with DIN 70000. The figures will be reduced accordingly.
2. **Fuel consumption**: The figures given were calculated using the specified measuring procedure. The figures are not intended to be used for comparing vehicles of different uses and different ways of driving.
3. **Vehicle data**: The fuel consumption and CO₂ emissions do not just depend on the vehicle itself, but are also influenced by driving conditions and other external factors. CO₂ is the greenhouse gas primarily responsible for global warming.
The figures for fuel consumption and CO₂ emissions can be found from page 56 onwards.

Special information about the wheels:
- Wheel: 235/55 R 19 E C–B 70–69 –
- Tyre size Fuel efficiency noise emission class
