The new Audi TT RS

Audi Vorsprung durch Technik
Experience the pinnacle of the legendary TT range with the new Audi TT RS Coupé and TT RS Roadster. Agile, exceptionally stable and brimming with muscular power, these iconic models deliver their enviable speed and acceleration thanks, in no small part, to their award-winning 2.5-litre TFSI engines.

Both compact and a dream to handle, these lively vehicles seem to cling to the road with the added traction of their RS sport suspension and fixed rear wings. This superb handling, combined with its 7-speed S tronic gearbox and quattro permanent all-wheel drive, make the TT RS range one of the most exhilarating experiences of high-performance driving.
Inside, the TT RS shows its sporty legacy with a new design package featuring Fine Nappa leather seats with honeycomb stitching and an RS sport leather steering wheel with two satellite controls. Audi drive select comes standard, letting you switch between sporty, dynamic or efficiency mode. The result is a car that can be enjoyed in three completely different ways, depending on your mood and needs.

The Audi virtual cockpit, with its built-in navigation tools, tells you everything you need to know about the car at a glance, allowing you to fluidly connect your phone and control everything with the push of a high-precision button – or even with your voice.

Undeniable sport cred
The newly redesigned exterior flaunts the athletic prowess of the TT RS and culminates in a distinctive rear spoiler. Details like the honeycomb radiator grille, widened sills, red brake callipers and RS suspension make for a striking update to the Audi TT RS’s already iconic look.

The TT RS’s four OLED lights create crisp light from organic light emitting diodes. The 3D design distributes their extensive shine with exact uniformity and precision. When locking or unlocking, the OLED lights put on a captivating display – a feature Audi has become known for pioneering.
Award winning engine

RS interior package
